

YUVRAJ BHAVSAR

PROFESSIONAL SUMMARY

Software Engineer with experience building scalable web applications, backend services, and cloud-based systems using React, TypeScript, Java, Spring Boot, and AWS.

Currently working within enterprise banking environments at NatWest, contributing to API development, data platforms, and reporting solutions. Comfortable working across frontend and backend technologies while collaborating closely with engineers, analysts, and stakeholders in Agile teams.

Outside of work, I enjoy building full-stack products from concept to deployment, with experience developing marketplace, business, and location-intelligence platforms using modern web technologies and AI-assisted development workflows.

WORK EXPERIENCE

Natwest Group (Maxcurve) | 2025 June - Present

Software Engineer

- Developed and enhanced Java & Spring Boot REST APIs, including validations, request/response handling, and error management.
- Built and executed ETL workflows using PySpark in Jupyter, ensuring data quality and transformation accuracy.
- Worked on AWS S3-based data storage and dataset structuring for downstream analytics and reporting.
- Queried and validated datasets using AWS Athena (SQL) to support business reporting.
- Created and maintained Amazon QuickSight dashboards, converting raw data into actionable insights.
- Supported AWS deployment processes, including packaging, versioning, and environment updates.
- Collaborated with frontend teams to ensure API usability and optimized data structures for UI consumption.
- Worked in Agile teams using JIRA and Git workflows, ensuring smooth delivery and release cycles.
- Coordinated with business analysts and stakeholders to translate requirements into technical solutions.
- Contributed to improving overall system reliability by following best practices in API design, logging, and data validation.

SKILLS

Core Skills

Languages:

Java, TypeScript, JavaScript, Python, SQL, Tailwind

Frontend Technologies:

React, Next.js, Tailwind CSS, HTML, CSS

Backend:

Spring Boot, REST APIs, JSON

Cloud & Data Tools:

AWS (S3, Athena, QuickSight), PySpark, Jupyter

Tools & Practices:

Git, GitHub, JIRA, Agile (Scrum), SDLC, Vercel

LANGUAGES

- English – Fluent
- Hindi – Fluent

PROJECTS

Make a Dish – Full-Stack Food Marketplace Platform

Technologies: React, TypeScript, Next.js, TailwindCSS, AWS S3, REST APIs

- Built a full-stack web platform enabling users to discover and order homemade food from local hosts.
 - Developed responsive and modern frontend interfaces using React and TailwindCSS, focusing on usability and smooth user experience.
 - Implemented authentication flows, cart persistence, cuisine browsing, and checkout functionality.
 - Integrated frontend components with backend APIs to handle user, host, and order workflows.
 - Designed scalable storage using AWS S3 for structured data and application assets.
 - Improved UI/UX through iterative enhancements, layout optimization, and search functionality improvements.
 - Used AI-assisted development tools to rapidly prototype features, refine UI flows, and improve development efficiency during iterative product development.
-

Habitat Finder – London Neighbourhood Research Platform

Technologies: Next.js, React, TypeScript, Tailwind CSS, MapLibre, TanStack Query, Vercel, Neon PostgreSQL

- Built a web platform helping renters and buyers compare London neighbourhoods based on transit, safety, walkability, green space, and housing costs
 - Developed an interactive map experience with area search, filtering, comparison tools, and personalized ranking preferences
 - Integrated public datasets from TfL, ONS, OpenStreetMap, and Police UK to generate neighbourhood insights and scoring.
 - Led the project end-to-end, including product design, development, deployment, and iterative feature improvements
-

Transcendent Talons – Full-Stack Business Platform

Technologies: Next.js, TypeScript, PostgreSQL, Prisma, Tailwind CSS, PayPal, Nodemailer, Vercel

- Designed and developed a full-stack business website for a custom press-on nail studio, supporting customer bookings, payments, reviews, and studio management.
 - Built a multi-step booking workflow with image uploads, pricing logic, and automated email notifications.
 - Integrated PayPal payments using secure server-side checkout flows
 - Developed a password-protected admin dashboard for managing customer requests, order statuses, and review moderation
-

EDUCATION

Symbiosis University of Applied Sciences, Indore

Bachelor of Business Administration (Retail Management & E-Commerce)
CGPA - 8.5
